Patient Portal Self-Check-In Workflow

The guide outlines the steps patients will take to navigate through the portal self-check-in process.

Patients will now complete health history forms as part of their pre-appointment self check-in workflow. If there are multiple patient health history forms available for a single appointment type, questions are merged and present a single workflow to the patient.

Self check-in is available to portal and non-portal users, so everyone completing self check-in has the opportunity to update their health history information prior to their appointment. Once patients complete self check-in, they cannot access the health history form again.

The links to health history forms have been removed from the Patient Portal for clients that have self check-in enabled.

How a patient completes health history forms from a computer

1. Begin the pre-appointment self check-in workflow on a computer either through a ReminderCall email or from the Patient Portal by clicking Check in now:

2. The last step in the workflow is Health History Forms. Review the summary page and, if necessary, click Update to add/remove/update conditions, or click No Changes.

Allergies Needs review	No Changes	Update
Existing Allergies		
Dog Dander		
House Dust Reaction: Chest pain - Mild to moderate		

3. Click Continue at the bottom of the page to finish self check-in.

4. When the patient arrives, reconcile the patient's completed health history information within the encounter through the usual reconciliation workflow, or print the form from the Check-in page and manually reconcile it.

How a patient completes health history forms on a mobile device

1. Begin the pre-appointment self check-in workflow on a mobile device from a ReminderCall email or by tapping Check In on the mobile Patient Portal:

2. Enter any **Questions** you'd like to discuss with your provider during your visit and tap **Continue**.

 Review your contact information and, if necessary, tap Update to edit the information, or tap No Changes. The Health History Form appears.

Health History Forms on a mobile device include these sections:

- o Medications
- o Allergies
- o Medical History
- o Surgical History
- o Social History
- o Family History
- o Obstetrics and Gynecology (if applicable)
- 4. To make changes, tap Update or Add , depending on the section. Edit your information and tap Save.

o If you tap No Changes on each health history section, this message appears at the end of the self check-in workflow:

Confirm Health History	
You have not updated of this form. Would you like to subm having "No Changes"?	certain sections of nit those sections as
Go Back	Yes

• You can go back and make changes or tap Yes to complete self check-in.

A final confirmation section appears.
