

In an effort to better serve our patients, we have partnered with CHADIS, Child Health and Development Interactive System, a service that allows you to complete developmental questionnaires online when it is most convenient for you. Using CHADIS allows you to input your child's medical history, document milestones and let us know of any issues or concerns you want to discuss.

Follow the steps outlined below and you will be directed to a secure, HIPAA compliant website.

Please follow the steps below to access the questionnaires for your child(ren):

1. Go to www.chadis.com
2. Click on "**Register**" under families and teens.
3. Use the following invitation code (which is the same as our office phone number) **4102247667** and *enter in your name* (not your child's) for the first and last name.
4. Your e-mail address will become your username. Create a password and then click on "**Register.**"
5. On the next screen, enter your child's information.
6. Select the doctor that you are seeing and the appointment type.
7. Choose a visit type (**Please complete these no sooner than 2 weeks before your appointment.**)
 - a. If your child is coming for an **18 month or 24 month well visit**, choose well child/ checkup visit. Select "**begin**" Modified Checklist for Autism in Toddlers (M-CHAT) questionnaire.
 - b. If your child is coming for a **consult or med check**, choose between ADHD initial OR ADHD follow-up. Then click "**begin**" Vanderbilt questionnaire. If you are having a teacher, guidance counselor, etc. fill out a questionnaire, please log into your account and invite the individual using their email address. Please be sure to notify your provider if you invite a teacher, guidance counselor, etc. to fill out a questionnaire because the system will not flag the provider and the results must be retrieved manually.
8. Complete questionnaires: To begin each questionnaire, click on the word "begin" to the left of the questionnaire name and select "save and continue" when completed.
 - a. If you are satisfied with your answers, click "Send It, I'm Done."
 - b. If you have not finished the questionnaire, but need to stop, please select "save and quit" so that you can continue or restart the questionnaire at another time.

Thank you for your support and helping us to provide the best care possible for your child.

Sincerely,

Bayside Pediatrics
