

### **Care of Pierced Ears**

1. Keep earrings in for 6 weeks. You may change them after the 6 week period.
2. Turn earrings daily in a full 180 degree circles.
3. Cleanliness is essential. Clean ear lobes in front and back of earring daily with hydrogen peroxide, alcohol or other antiseptic.
4. Protect newly pierced ears from irritants such as cosmetics, hairspray, etc.
5. If redness, irritation, itching, soreness, oozing or any disorder of the ears should occur consult a physician promptly.
