

E-PRESCRIBING / MEDICATION HISTORY CONSENT FORM

Touchstone Internal Medicine & Pediatrics

The providers at Touchstone Internal Medicine & Pediatrics use an electronic medical record system that allows electronic prescribing of medications. Prescriptions are sent to your pharmacy through a secure connection (RxHub) which improves the accuracy and timely transmission of your medical information.

E-Prescribing greatly reduces medication errors and enhances patient safety. There are several standards that have to be included in an e-prescription program. These include:

1. **Formulary and benefit transactions:** Gives the prescriber information about which drugs are covered by the drug benefit plan.
2. **Medication history transaction:** Provides the physician with information about previous and current medications the patient is taking to minimize the number of adverse drug reactions.
3. **Fill status notification:** Allows the prescriber to receive an electronic notice from the pharmacy telling them if the patient's prescription has been picked up or partially filled.

My signature certifies that I have read and understood the scope of my consent and that I authorize the access of my medication history.
