Pairing the t:connect Mobile App

with the t:slim X2 Insulin Pump

The instructions below are provided as a reference tool for caregivers who are already familiar with the use of an insulin pump and with insulin therapy in general.

Not all screens are shown. For more detailed information on the operation of the t:slim X2™ insulin pump, please refer to its user quide,

Download the App

Pairing the t:slim X2 insulin pump with a phone via *Bluetooth*® technology will allow the pump to properly communicate with the t:connect® mobile app. If the proper software version is installed on the pump, the whole process should take less than five minutes.

To begin the pairing process, visit the Google Play store or the Apple App Store, search for "Tandem Diabetes" and select "t:connect mobile" from the results. It is recommended to upload pump data via USB prior to syncing your pump with the app.

Enable Bluetooth Connection

Unlock the pump, tap OPTIONS, tap 4, tap Device Settings, then select Bluetooth Settings.

NOTE: If Bluetooth Settings is not an option, you may need to update your pump software. Visit portal.tandemdiabetes.com to check for available software updates.

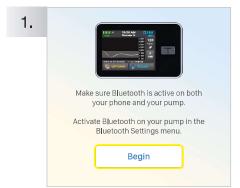

Tap the toggle to turn on the Mobile Connection and enable Bluetooth.

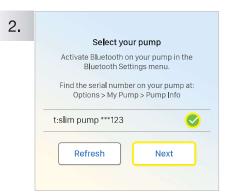

Select to turn on the Mobile Connection. A brief confirmation screen will show that the ability to connect to a mobile device is now turned on.

Pair App With Pump

Go to the t:connect mobile app, login, and select Begin to start the pairing process. Select OK on the confirmation screen.

NOTE: Make sure that the Bluetooth setting on the device has already been turned on.

Make sure the pump is within close proximity to the phone. Once a connection is established, select the radio button next to the pump's serial number and tap Next.

On the pump, select Pair Device and then press to continue.

Pair App With Pump (continued)

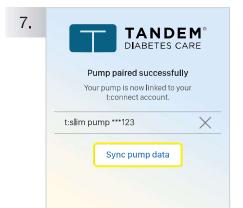

Using the mobile app, input the code below to connect your pump or close this prompt to cancel.

Pairing Code
A1b2 - C3d4 - E5f6 - G7h8

A unique pairing code will be automatically generated.

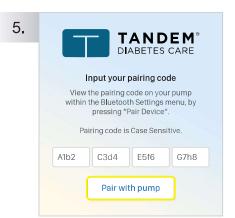

NOTE: DO NOT press OK located under the unique pairing code, as this will cancel the pairing process.

NOTE: The unique code is only valid for five minutes. If the code expires, the pairing process must be restarted by selecting Pair Device from the Bluetooth Settings screen.

Press Sync pump data. The app will then import recent data from the insulin pump.

NOTE: It is recommended to upload current pump data via USB to the t:connect web application prior to syncing your pump with the app.

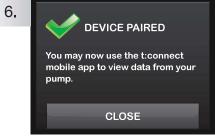

Enter the code that is displayed on the pump directly into the mobile app and press Pair with pump.

NOTE: The code is case sensitive and must be entered exactly as it is displayed. Your unique code is only valid for five minutes. If the code expires, you will need to begin the pairing process again.

The app now displays the pump data and is ready for viewing.

NOTE: Data uploads to t:connect do not take place in real-time and require an internet or wireless data connection.

Once the code has been successfully entered, a confirmation screen will appear on the pump. Tap CLOSE.

(877) 801-6901 tandemdiabetes.com

The information on the t:connect mobile app display may not be identical to the current status of your pump. Wireless uploads from the t:connect mobile app to the cloud-based t:connect web application require a compatible phone and an internet or wireless data connection. Uploads to the t:connect web application do not take place in real time and should not be relied upon by healthcare providers or caregivers for remote patient monitoring. Standard carrier data rates may apply.

Important Safety Information: Caution: Federal (USA) law restricts this device to sale by or on the order of a physician. The t:slim X2 insulin pump with interoperable technology is an alternate controller enabled (ACE) pump that is intended for the subcutaneous delivery of insulin, at set and variable rates, for the management of diabetes mellitus in people requiring insulin. The pump is able to reliably and securely communicate with compatible, digitally connected devices, including automated insulin dosing software, to receive, execute, and confirm commands from these devices. The pump is indicated for use in individuals 6 years of age and greater. The pump is intended for single patient, home use and requires a prescription. The pump is indicated for use with NovoLog or Humalog U-100 insulin. The t:slim X2 pump must be removed before MRI, CT, or diathermy treatment. Visit tandemdiabetes.com/safetyinfo for additional important safety information.

t:connect mobile app: The t:connect mobile app is intended to be a secondary display for compatible Tandem Diabetes Care® insulin pumps and is capable of wirelessly uploading pump data it receives into the t:connect web application. The t:connect mobile app is not intended to control an insulin pump and is not intended to be a replacement for the information displayed on your insulin pump. Dosing decisions should not be made based on this device. The user should follow instructions on the continuous glucose monitoring system. This device is not intended to replace self-monitoring practices as advised by a physician.
